Elevate Your Camping Adventure with the Marmot Traillight 2

Performance and Durability Combined

The Marmot Traillight 2 camping tent is the perfect tent for campers who love the outdoors. The 68-denier ripstop polyester body, floor and fly packs down small, allowing for more items in your backpack. It's relatively inexpensive (compared to other materials), giving you more bang for your buck and more money in your wallet. Its ripstop fabric, durable and resistant to ripping and tearing, gives you peace of mind when camping in inclement weather or harsh conditions.

Its simple design allows for quicker setup and breakdown times. Many campers appreciate the minimalist aesthetics of simple tents. An integrated awning extends over the door, keeping you dry in the rain when you want to step outside for that early morning cup of coffee.

Its single door and window with poly-fine mesh allows for excellent airflow while keeping out insects and bugs. This ventilation is essential to prevent condensation buildup inside the tent, which can lead to a damp and uncomfortable environment.

Interior storage pockets allow you to keep necessary items close at hand such as flashlights, keys and first-aid kits. Drinks and snacks are always just a reach away.

The Marmot Traillight 2 camping tent. Outstanding performance. Superior design.
